Correlated to Native American Education Lessons

Highlighted Standards were updated in 2018

### **Social Studies Content Standard 1 - Citizenship, Government, and Democracy**

Students analyze how people create and change structures of power, authority, and governance to understand the continuing evolution of governments and to demonstrate civic responsibility.

#### **Rationale**

The vitality and continuation of a democratic republic depends upon the education and participation of informed citizens. All students should have opportunities to apply their knowledge and skills and participate in the workings of the various levels of power, authority, and governance, which should be applied to the rights and responsibilities of good citizenship. W.S.21-9-102 requires all publicly funded schools in Wyoming to “give instruction in the essentials of the United States constitution and the constitution of the state of Wyoming, including the study of and devotion to American institution and ideals...” In order to receive a high school diploma, instruction must be given for at least three (3) years in kindergarten through grade eight (8) and one (1) year in the secondary grades.

SS8.1.1 Explain the rights, duties, and responsibilities of a United States citizen.

## **Social Studies Content Standard 2 – Culture and Cultural Diversity**

Students demonstrate an understanding of the contributions and impacts of human interaction and cultural diversity on societies. Rationale Culture helps us to understand ourselves as both individuals and members of various groups. In a multicultural society, students need to understand multiple perspectives that derive from different cultural vantage points. As citizens, students need to know how institutions are maintained or changed and how they influence individuals, cultures, and societies. This understanding allows students to relate to peoples of local, tribal, state, national, and global communities.

**SS8.2.1** Compare and contrast the ways various groups (e.g., ethnic communities, and Indigenous Tribes of Wyoming) meet human needs and concerns (e.g., self-esteem, friendship, and tribal heritage) and contribute to identity, situations, and events.

|                                                                                                                                                                                                                |                                                                                                                                                           |

### **Social Studies Content Standard 3 - Production, Distribution, and Consumption**

Students describe the influence of economic factors on societies and make decisions based on economic principles.

#### **Rationale**

In a global economy marked by rapid technological, political, and economic change, students will examine how people organize for the production, distribution, and consumption of goods and services.

SS8.3.1 Identify and apply basic economic concepts (e.g., supply, demand, production, exchange and consumption, labor, wages, scarcity, prices, incentives, competition, and profits).

|                                                                                                         |  |

|---------------------------------------------------------------------------------------------------------|--|

SS8.3.2 Compare and contrast how people organize for the production, distribution, and consumption of goods and services in various economic systems (e.g., characteristics of market, command, and Mixed economies).

SS8.3.3 Describe the impact of technological advancements on production, distribution, and consumption. (e.g., businesses and/or corporations in the United States and the world).

SS8.3.4 Explain or illustrate how money is used by individuals, groups, and financial institutions.

|                                                                                                          |  |

### **Social Studies Content Standard 4 - Time, Continuity, and Change**

Students analyze events, people, problems, and ideas within their historical contexts.

#### **Rationale**

Students need to understand their historical roots and how past events shape the past, present, and may shape the future. Students must know what life was like in the past to comprehend how things change and develop over time. Students gain historical understanding through inquiry, of history by and through researching and interpreting events affecting individual, local, tribal, state, national, and global histories.

**SS8.4.1** Describe how historical events impact the future (cause and effect) and how change spreads to other places (e.g., spread of industrial revolution or causes of the Civil War, impacts of Manifest Destiny, aftermath of French and Indian War, and progression of Indian Removal Act).

|                                                                                                                                                 |                                                                                                                                                               |

### **Social Studies Content Standard 5 - People, Places, and Environments**

Students apply their knowledge of the geographic themes (location, place, movement, region, and human/environment interactions) and skills to demonstrate an understanding of interrelationships among people, places, and environment.

#### **Rationale**

Students gain geographical perspectives of the community, state, nation, and world by studying the Earth and how humans interact with people, places, and environments. Their knowledge of geography allows students to make local and global connections. Students develop increasingly abstract thought as they use data and apply skills to analyze human behavior in relation to its physical and cultural environment.

SS8.5.1 - Spatial Use and create models of the Earth to analyze the interactions of physical and human systems to demonstrate global interconnectedness.

### **Social Studies Content Standard 6 - Technology, Literacy, and Global Connections**

Students use technology and literacy skills to access, synthesize, and evaluate information to communicate and apply social studies knowledge to global situations.

### Rationale

Using a variety of resources, students will apply the inquiry process to locate, interpret, and evaluate multiple primary and secondary sources. Students will use this information to become critical thinkers and decision makers in a global community. Social Studies Content Standard 6 was written around the Framework for 21st Century Skills and the Common Core Literacy Standards for History and Social Studies.\*

SS8.6.1 Use and evaluate multiple sources of information in diverse formats and media in order to address a question or solve a problem.
