

A Whole Lot of Sculptures

Video

[Whole Lotta Lotta](#)

Activity

3D Sculpture

Materials:

- Recycled and Found Items-cardboard tubes, egg cartons, plastic lids, old CDs, buttons, Styrofoam, fabric scraps, or paper rolls
- Attachment Tools-glue, tape, Velcro, modeling clay or magnets
- Decorative Items-stickers, beads, feathers, paint, markers or googly eyes

Directions:

Help your child choose a flat base for their sculpture. Using recycled and found “junk” materials, encourage imagination over perfection as they add pieces one at a time. Let them decide where and how to attach each piece, thinking about colors, shapes, and objects that represent them. Continue building until they feel their creation is complete.

Caregiver Tips

Encourage your child to use their favorite color. Help them add features that represent them, such as hair color, clothing, or glasses. Include something that shows what they love to do—music, sports, or outdoor activities—and add a detail that makes them feel proud or special.
